## Summary

---

Building computers, learning programming languages, and developing digital products isn't just a hobby it's a passion. I make virtual machines and EC2 instances and manage LAN networks, virtual networks, and Virtual Private Cloud networks in AWS. I'm a problem solver at heart who has been able to overcome many IT issues from improper disk partitions to connecting a motherboard to the computer case USB ports. I enjoy helping make the technology work for people by automating queries and helping to run servers.

I am a full-time student at Lone Star College Cy-Fair and plan on transferring to Texas A&M University for a Computer Science Engineering degree in 2022. I have my Google certificate in Python and am in process of completing an Amazon Web Services Solutions Architect certificate.

## Skills

---

### IT Skills :

- Windows/Unix OS Troubleshooting
- FTP/PuTTY/Port Management
- Network Configurations
- Managing Permissions
- Cyber-Security Perspective
- Customer Service

### Programming Skills :

- Python
- Bash/Powershell
- AWS CLI/JSON
- REST API
- Basic Web Development
- SQL

## Work Experience

---

### Computer Technician — Part-Time 2020 to 2021 — EFoods Imports Inc.

Managed LAN network and ports so devices can connect to router securely.  
Remotely connected to a computer to troubleshoot software issues.

## Volunteer Experience

---

### Volunteer Staff — 2017 — St. Vincent de Paul Thrift Store

Received and evaluated donations as well as painting and placing baseboards.

## Education

---

### Certificate

Crash Course on Python - Google

### Lonestar College

Computer Science Engineering (Anticipated)

### High School Diploma

Notre Dame Preparatory - Scottsdale, AZ
