Summary

Managing computers and software can be an exhilarating experience until challenges arise. While it grants you significant control over numerous systems and the ability to automate complex processes during smooth operations, troubleshooting can quickly turn into a time-consuming task when issues surface. IT, fundamentally, is about adept troubleshooting, demanding precise problem diagnosis and the implementation of the most probable solutions as a primary approach. With extensive hours dedicated to certificate-based study and hands-on experience gained through home labs and GitHub projects, I am enthusiastic and well-prepared to embark on a fulfilling career in IT. Thank you for considering me as a candidate for this position.

Skills

IT Skills :

— Operating System Troubleshooting
— Hardware Troubleshooting
— Network Setup and Optimization
— User Permissions and Security Administration
— Cybersecurity Awareness and Best Practices
— Client-Focused IT Support

Programming Skills :

— Python
— Bash/Powershell
